Contents

<i>Preface</i>	<i>v</i>
1. BASIC CIRCUIT ELEMENTS AND WAVEFORMS	1
1.1 Introduction	1
1.2 Circuit Components	2
1.3 Assumptions for Circuit Analysis	13
1.4 Definitions	14
1.5 Conservation of Energy	16
1.6 Source of Electrical Energy	16
1.7 Standard Input Signals	19
1.8 Sinusoidal Signal	23
1.9 Kirchhoff's Laws	27
2. MESH AND NODE ANALYSIS	42
2.1 Introduction	42
2.2 Kirchhoff's Laws	47
2.3 Source Transformation	51
2.4 Mesh and Node Analysis	55
2.5 Network Equations for RLC Network	66
2.6 Magnetic Coupling	78
3. GRAPH THEORY AND NETWORK EQUATION	102
3.1 Introduction	102
3.2 Graph of a Network	102
3.3 Trees, Cotrees and Loops	104
3.4 Incidence Matrix	106
3.5 Cut-Set Matrix	114
3.6 Tie-Set Matrix and Loop Currents	119
3.7 Number of Possible Trees of a Graph	121
3.8 Analysis of Networks	122
3.9 Network Equilibrium Equation	129
3.10 Duality	162
3.11 General Network Transformations	167

Copyrighted material

9.2 Mechanical Elements	392
9.3 D'Alembert's Principle	394
9.4 Force-Voltage Analogy	395
9.5 Force-Current Analogy	398
9.6 Mechanical Couplings	399
9.7 Electro-Mechanical System	419
9.8 Liquid-Level System	426
10. TWO-PORT NETWORK	432
10.1 Introduction	432
10.2 Characterization of Linear Time-Invariant Two-Port Networks	433
10.3 Open-Circuit Impedance Parameters	435
10.4 Short-Circuit Admittance Parameters	437
10.5 Transmission Parameters	439
10.6 Inverse Transmission Parameters	440
10.7 Hybrid Parameters	443
10.8 Inverse Hybrid Parameters	444
10.9 Interrelationships between the Parameters	454
10.10 Interconnection of Two-Port Networks	472
10.11 Two-Port Symmetry	494
10.12 Input Impedance in terms of Two-Port Parameters	495
10.13 Output Impedance	497
10.14 Image Impedance	498
10.15 Transistors as Two-Port Active Network	499
10.16 Network Components	532
11. ATTENUATORS	544
11.1 Introduction	544
11.2 Nepers, Decibels	544
11.3 Lattice Attenuator	546
11.4 T-Type Attenuator	548
11.5 π -Type Attenuator	548
11.6 L-Type Attenuator	550
11.7 Ladder Type Attenuator	551
11.8 Balanced Attenuators	552
11.9 Insertion Loss	552
12. CONVENTIONAL FILTERS	557
12.1 Introduction	557
12.2 Image Impedance	557
12.3 Hyperbolic Trigonometry	561
12.4 Propagation Constant	562
12.5 Properties of Symmetrical Network	563
12.6 Filter Fundamentals	564

Copyrighted material

4. FOURIER SERIES	187
4.1 Introduction	187
4.2 Trigonometric Fourier Series	188
4.3 Evaluation of Fourier Coefficients	189
4.4 Waveform Symmetry	197
4.5 Fourier Series in Optimal Sense	207
4.6 Exponential Form of Fourier Series	208
4.7 Effective Value	217
4.8 Fourier Transform	219
4.9 Effective Value of a Non-Sinusoidal Wave	234
5. THE LAPLACE TRANSFORM	245
5.1 Introduction	245
5.2 Laplace Transformation	246
5.3 Some Basic Theorems	247
5.4 Gate Function	258
5.5 Impulse Function	262
5.6 Laplace Transform of Periodic Functions	263
6. APPLICATION OF LAPLACE TRANSFORM	276
6.1 Introduction	276
6.2 Solution of Linear Differential Equation	276
6.3 Heaviside's Partial Fraction Expansion	277
6.4 Kirchhoff's Laws	282
6.5 Solution of Network Problems	289
7. NETWORK THEOREMS	316
7.1 Introduction	316
7.2 Superposition Theorem	316
7.3 Reciprocity Theorem	325
7.4 Thevenin's Theorem	327
7.5 Norton's Theorem	330
7.6 Millman's Theorem	335
7.7 Maximum Power Transfer Theorem	340
7.8 Substitution Theorem	343
7.9 Compensation Theorem	346
7.10 Tellegen's Theorem	348
8. RESONANCE	368
8.1 Introduction	368
8.2 Series Resonance	368
8.3 Parallel Resonance	379
9. ANALOGOUS SYSTEM	391
9.1 Introduction	391

Copyrighted material

17.3 Signal Flow Graph	757
17.4 Stability Criterion of Feedback System	766
17.5 Routh-Hurwitz Stability Criterion	767
18. FREQUENCY RESPONSE PLOTS	779
18.1 Introduction	779
18.2 Network Response due to Sinusoidal Input Functions	779
18.3 Plots from s -Plane Phasors	782
18.4 Magnitude and Phase Plots	790
18.5 Polar Plot	790
18.6 Logarithmic Plot	805
18.7 Measure of Relative Stability	812
18.8 Root Loci	816
18.9 Nyquist Stability Criterion	821
19. COMPUTER APPLICATIONS	836
19.1 Introduction	836
19.2 Numerical Methods for Evaluation of Definite Integral by Simpson's Rule of Integration	836
19.3 Network Solution by Matrix Inversion—Gauss Elimination Method	846
19.4 Computer Program for Plotting Transient Response	852
19.5 Computer Program for the Solution of Vector Matrix Differential Equation	859
19.6 Computer Program for the Evaluation of Convolution Integral	863
19.7 Computer Program for Finding Roots of Polynomial Equations	868
19.8 Computer Program for Obtaining Bode Plot	872
19.9 Computer Program for Evaluating Fourier Coefficients	881
APPENDIX A: Algebra of Complex Numbers (Phasors)	888
APPENDIX B: Objective Type Questions	892
APPENDIX C: Answers to Selected Problems	905
APPENDIX D:	920
Index	923

Copyrighted material

13. CONVOLUTION INTEGRAL	592
13.1 Introduction	592
13.2 Convolution Theorem	592
13.3 Evaluation of the Convolution Integral	593
13.4 Inverse Transformation by Convolution	595
13.5 Impulse Response	599
13.6 Graphical Convolution	601
14. STATE VARIABLE ANALYSIS	624
14.1 Introduction	624
14.2 State Variable Approach	624
14.3 State Space Representation	625
14.4 Transfer Function	625
14.5 Linear Transformation	626
14.6 Diagonalization	628
14.7 State Transition Matrix	640
14.8 Solution to Non-Homogeneous State Equations	643
14.9 Minimal Set of State-Variable Formulation	649
15. NETWORK FUNCTIONS	658
15.1 Introduction	658
15.2 Ports and Terminal Pairs	658
15.3 Determinant and Cofactors for Determining Network Function	658
15.4 Network Functions	660
15.5 Poles and Zeros	666
15.6 Necessary Conditions for Driving-Point Function	668
15.7 Necessary Conditions for Transfer Function	668
15.8 Application of Network Analysis in Deriving Network Functions	669
15.9 Circuits with Active Devices	672
15.10 Time Domain Behaviour from Pole-Zero Plot	678
15.11 Transient Response	681
16. PASSIVE NETWORK SYNTHESIS	699
16.1 Introduction	699
16.2 Positive Real Functions	699
16.3 Driving Point and Transfer Impedance Function	704
16.4 LC Network	705
16.5 Synthesis of Dissipative Network	721
16.6 Two-Terminal R-L Network	721
16.7 Two-Terminal R-C Network	727
17. FEEDBACK SYSTEM	744
17.1 Introduction	744
17.2 Block Diagram Representation	744

Copyrighted material
