

Advanced Nondestructive Evaluation
Manufacturing Group, Faculty of Mechanical Engineering,
K. N. Toosi Univ. of Technology
نیمسال اول ۹۷-۱۳۹۶ – Fall 2017

Instructor: F. Honarvar (honarvar@kntu.ac.ir)
Time: Saturday and Monday, 9:00-10:30 a.m.
Venue: Mechanical Engineering Building, Rm. 207
Marking: Quiz: 20%, Final: 50%, Project: 25%, Assignments 5%
Web site: <http://wp.kntu.ac.ir/honarvar>

Course material:

1. Dr. F. Honarvar's course notes. Faculty of Mechanical Engineering, K. N. Toosi University of Technology.
2. Bray, D.E. and Stanley, R.K.; "Nondestructive Evaluation: A Tool in Design, Manufacturing and Service," CRC Press, Inc., 1997. (Nopardazan Publishers)

Objectives:

To familiarize the students with principles and applications of commonly used NDE techniques. These techniques are ultrasonic testing (UT), radiography (RT), magnetic particle testing (MT), liquid penetrant testing (PT), and eddy current testing (ET). The course is composed of lectures and lab demonstrations. Other NDE techniques such as visual testing (VT), acoustic emission (AE), and infrared thermographic testing (TT) are also briefly introduced.
