CHAPTER 13

HOT DEFORMATION AND DYNAMIC RESTORATION

- 13.1 Introduction
- 13.2 Dynamic recovery
 - 13.2.1 Constitutive relationships
 - 13.2.2 Mechanisms of microstructural evolution
 - 13.2.3 The microstructures formed during dynamic recovery
 - 13.2.4 Texture formation during hot deformation
 - 13.2.5 Modelling the evolution of microstructure
- 13.3 Discontinuous dynamic recrystallization
 - 13.3.1 The characteristics of dynamic recrystallization
 - 13.3.2 The nucleation of dynamic recrystallization
 - 13.3.3 Microstructural evolution
 - 13.3.4 The steady state grain size
 - 13.3.5 The flow stress during dynamic recrystallization
 - 13.3.6 Dynamic recrystallization in single crystals
 - 13.3.7 Dynamic recrystallization in two-phase alloys
